DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-40, drawn to an aircraft routing proposal, classified in class 701, subclass 3.
 - II. Claim 41, drawn to vehicle proposed arc assignment, classified in class 701, subclass 202.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention one has separate utility such as proposing a route for an aircraft considering actual and/or possible changes based on maintenance and operational constraints. On the other hand, invention two proposes an arc (part of the route) for the vehicle not based on maintenance and operational constraints. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
5. A telephone call was made to Mr. Berkowitz on 8/18/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3661

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
